The invisible treehouse

By Joey Sambora

Most people live in houses on the ground, but my house is... in the trees! It's the mirrorcube treehouse, and it's exactly what it sounds like – a giant box made of mirrors, hanging¹ in the middle of the forest. From the outside, it's almost impossible to see because it reflects everything around it. Sometimes birds even fly right into it because they can't tell it's there!

To get inside, you have to go through a rope bridge², which is pretty cool. It seems you're going into a secret place. The inside is small but cosy, with only three rooms: a bathroom, a kitchen and a bedroom. There are windows on every side, so you can see everything around you. One of the best parts is that no one can see you – and that's AWESOME! Sometimes I just sit by the window and watch animals passing by. At night, the sky is full of stars and it's completely quiet.

Living here is so peaceful... There are no neighbours, no streets, no cars – only the sound of nature. Sometimes I miss being around other people, but then I remember how special this place is. How many people can say they live in a treehouse that's invisible? It's like something out of a fairy tale.

Based on: www.travel+leisure.com; www.architecturaldigest.com

Vocabulary: ¹ hanging = pendurada; ² rope bridge = ponte de corda
